ML1
Frame
contract, prediction time
ML1
Audit and split
grouped / time splits, leakage
ML1
ML2
ML4
Features and pipelines
scaling, selection, PCA
ML1
ML2
ML3
ML5
Models
linear to ensembles, clusters, detectors
ML1
ML5
Evaluate and select
metrics, events, nested CV
ML2
Explain and document
importance, model cards
ML5
Deploy and monitor
thresholds, drift
monitoring evidence sends you back to framing
