fit on the training portion only; applied unchanged to validation and test
Training portion, as supplied
PIP 542 – 1,227
PDP 1,299 – 2,129
Q 4,690 – 7,601
THP 101 – 131
Mamps 68 – 133
PIT 155 – 206
50 rows: all six missing
Decide what a missing row means
drop and document, or impute and say so
Median imputation
optional missing-indicator column
Standard scaling
mean 0, SD 1 per column
Network input: training columns centred at 0 with SD 1
held-out entities can still fall outside the training range: PDP reaches z = −5.1
