Minute 1
Problem and contract
Minute 2
Baseline vs candidate
Minute 3
Evidence plot
Minute 4
One failure examined
Minute 5
Conclusion and limits
target, row unit, split;
what the test can show
same rows, same metric;
reference listed first
one readable figure;
evaluation set named
a slice or an example;
hypothesis and next test
recommendation, limits,
what would change it
then two minutes of questions: what can the evaluation establish, and what would change the conclusion?
